

PERSONAL RESALE TOOL • GRAILED

Tailor *Studio*

A folder of clothing photos
becomes ready-to-post Grailed
listings — priced, written, and
filled in for your review.

● Groups & drafts

● Prices from sold comps

● Fills the form — you publish

GUIDE & OVERVIEW

01

THE PROBLEM

Every listing is
the same twenty
minutes of busywork.

15–20_{min}

per item, by hand today

THE PROBLEM

01

Sort a batch shoot
into per-item groups

02

Write a title and
description from
scratch

03

Price it against
recent sold listings

04

Retype every field
into the sell form

WHAT IT IS

Tailor does the tedious work *before* the sale — grouping, writing, and pricing — then types the draft into a real Grailed form for you.

The point of sale stays human. It never logs in, never solves captchas, and never clicks Publish.

Form-fill assistance, not a bot

THE WORKFLOW

Five stages from photo folder to published listing.

01 • AUTO

Import

Vision groups the photos by item.

02 • AUTO

Draft

Title, description, price from comps.

03 • YOU

Review

Fix groups, confirm the key fields.

04 • YOU

Fill

One click types it into Chrome.

05 • YOU

Publish

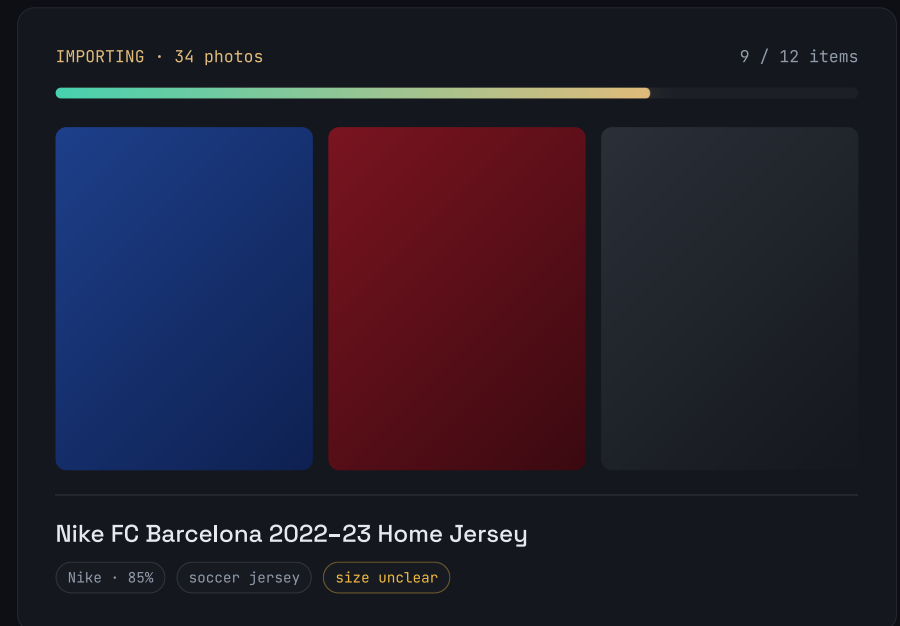

You review and post it yourself.

STAGE 01 · IMPORT

Point it at a folder. It sorts the shoot.

Vision groups the photos by garment and reads brand, category, size, condition, and color from the images.

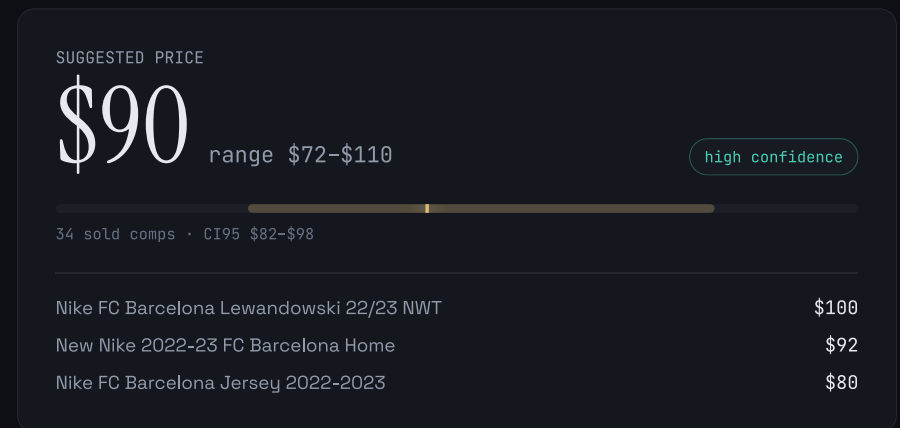

- Confident groups become priced drafts automatically
- Anything ambiguous is flagged for Review, never guessed

A written, priced listing — with the comps behind it.

A title and structured description, and
a price range from real Grailed sold
comparables — weighted for relevance,
with a confidence rating.

- No authenticity claims — probable brand, never confirmed
- Comps are cached and rate-limited behind a safety guard

STAGE 03 · REVIEW

You confirm — one card per draft, keyboard-first.

Fix any uncertain groups, confirm the six fields you know at a glance, and skim the text. Complete drafts are skipped.

FC Barcelona 2022–23 home soccer jersey with Lewandowski #9 print. Polyester, Nike home kit with Spotify front sponsor...

STAGE 03 · REVIEW

07

STAGE 04 • FILL

One click types the whole draft into Chrome.

Into a real, separately-launched Chrome on the Grailed sell form — title, price, condition, photos, and the full category cascade — with a live per-field checklist.

F fill the current draft

• FILLING • grailed.com/sell/new

- ✓ Title typed
- ✓ Description typed
- ✓ Price • \$90 typed
- ✓ Category → Size → Designer cascade
- Photos • 2 of 3 **uploading**

• Never clicks Publish — that stays with you.

STAGE 04 • FILL

08

You review the form, click Publish, and roll to the next.

YOUR CALL

Publish in Chrome

Every field is in and waiting. You look it over and click Publish — the app never does.

ONE CLICK

Fill the next draft

“I published — fill next” advances the queue and starts the next fill. That click is the only trigger.

SAFETY RAILS

What Tailor does — and what it never does.

DOES

- Organizes your photos into items
- Drafts titles, descriptions, and tags
- Pulls sold comps to suggest a price
- Fills the Grailed form — only when you click

DOES NOT

- Log in for you — signing in is always you
- Submit or publish anything, ever
- Bump, message, or send offers on its own
- Touch your account while you're away

BUILT FOR SPEED

A keyboard-first loop, once you're set up.

J **K** move through the draft queue

F fill the current draft into Chrome

⌘ ↵ save this draft and advance

⌘ K command palette, from any screen

BUILT FOR SPEED

GET STARTED

Three steps to your *first listing*.

1

Import a folder of item photos

Tailor groups them and drafts titles, prices, and details for every piece.

2

Launch Chrome and sign in

The app opens its own Chrome window; signing in to Grailed is always you.

3

Open a draft, click Fill, publish

Fill types it into the form; you review and click Publish yourself.

Reopen this guide any time from the “?” up top.
